

World Archery's Beat the Outbreak Online Archery League target – Week 4. You have 25 arrows and the goal is to shoot the circles in number order. Your score is the highest number you hit. (Keep tally of the arrows you've shot.)

Difficulty	Tally	Score
Beginner		
Normal		
Pro		

Beginner difficulty: Linecutters count as hits. Can shoot circles in any order. Score only consecutive numbers. (For example, hits on circles 1, 2, 3, 5, 6, 7 after 25 arrows scores 3 because 4 is missing.)

Normal difficulty: Linecutters count as hits. Circles must be shot in number order.

Pro difficulty: Linecutters count as misses (inside out). Circles must be shot in number order.

If shooting in number order (normal or pro difficulties) and a future circle is hit, that shot is a miss and the circle must be shot again when required.

You can pull arrows at any time.
